Chinazor Blessing Umeakuka

Product Designer (UI/UX) · SaaS, fintech, healthtech and mobility · Web and mobile

umeakukachinazor@gmail.com · 09039033451 · LinkedIn

Summary

Product Designer with about four years of experience designing web and mobile products across SaaS, healthtech, fintech, blockchain, edtech and mobility. I work across the full design process: understanding the problem, research and competitor analysis, information architecture, user flows, high-fidelity UI, design systems and developer handover. I led the product and brand design of Pilotspan, a home health management platform that launched in February 2026, and designed RydeAssist, an accessibility-first ride-booking product, end to end as the sole designer. Open to remote Product Designer roles and selected freelance projects.

Core skills

- **Product and UX:** user research, competitor analysis, information architecture, user flows, wireframing, prototyping, usability analysis, UX audits
- **UI and visual:** responsive web and mobile design, design systems, component libraries, accessibility (WCAG), brand identity, style guides
- **Collaboration:** working with product managers, engineers and founders; developer handover and documentation; Agile and Scrum ceremonies
- **Tools:** Figma, Adobe XD, Photoshop, Framer, Notion, Azure DevOps

Professional experience

Product Designer, Spurt! Group

January 2026 – present · Full time

- Design interfaces for the SpurtX! multi-tool platform (Score, Spot, Sync, Spark, Spur) with product managers and engineers, turning user stories, wireframes and PRDs into high-fidelity Figma prototypes.
- Audited the live SpurtX! platform for usability, accessibility and brand consistency, prioritised the findings by user impact and wrote them as developer-ready tickets. Developers accepted the majority of findings and the first fixes shipped.

- Build and maintain component libraries and style guides so the product stays consistent across tools, with attention to accessibility and responsive behaviour.
- Design admin dashboard layouts, analytics views and interactive modules, and keep design files documented and aligned with each sprint release.
- Lead visual strategy and brand execution across Spurt!, SpurtX!, Solutions and Paperclip, including campaign design, motion and social content.
- Creative lead for Visual Sculptors, coordinating design sprints with product, communications and operations teams.
- Run design reviews and critiques, and keep finished work in a shared creative repository.

Product Designer, Cosmos Design Space

February 2025 – present · Part time

- Designed most of the screens for Revela, an event-management MVP for African organisers, working within a design direction set by the studio.
- Improved onboarding and learning flows and built consistent components, icons and typography for Cosmos iAcademy, a digital education platform.
- Used user interviews and competitor benchmarking to inform feature direction, and presented design solutions to the team.

UI/UX Designer, Roburna Blockchain

January 2025 – February 2025 · Contract

- Designed onboarding, dashboard and transaction flows for RobuPay, a crypto payment product, focusing on clarity and trust.
- Built a scalable icon and layout system used across modules, and kept designs consistent while working with developers and product managers.

UI/UX Designer, Vocalserv

May 2023 – January 2026 · Full time

- Led prototyping and UX optimisation for in-house digital products.
- Led UX, UI and brand design for Pilotspan (see Selected projects), and built the component libraries and visual standards that kept the team's output consistent.
- Took on project coordination and Scrum facilitation in 2024 alongside design work (informal responsibilities, not formal titles): ran sprints, removed blockers and coordinated design, development and leadership to meet deadlines.

- Recognised with Employee Excellence Awards (2023 and 2025) and Employee of the Month (2023).

Graphic Designer, freelance and contract

Elpistis Home (2023–2024) · Rocsar Foods (2022)

- Created marketing assets and branding for small businesses.

Selected projects

Pilotspan: home health management platform (Lead Product Designer)

Vocalserv · Healthtech SaaS · Launched February 2026

- Owned the design direction for both brand and product: visual identity, information architecture, navigation, page layouts and interface design.
- Designed one navigation shell and one reusable pattern for data-heavy lists and forms, applied across clinical logs, orders, claims, facilities and reports.
- Designed billing and claims screens with labelled sections and colour-coded statuses, plus subscription plans from Starter to Platinum and separate virtual-assistant plans on one comparable card structure.
- Built the design system and carried the same brand from the marketing website into sign-in, verification and the product.
- Helped clarify requirements and keep design and delivery aligned (informal product coordination alongside the design role).

RydeAssist: accessible ride-booking platform (Sole Product Designer, freelance)

2026 · Mobility and accessibility · Designs delivered

- Designed the product end to end, from concept to developer-ready screens, working directly with the project owner.
- Reviewed Uber, Bolt and Lyft to set the baseline riders already know, then designed rider and driver apps with a family view for monitoring rides.
- Introduced Voice Assist from the first screen and an Accessibility Mode toggle on sign-up and login, so visually impaired riders can create an account without help.
- Captured rider needs once and carried them through every booking to the driver's ride details.
- Redesigned the driver accessibility sign-up flow to fit local requirements and added an in-app space for driver training guides after owner feedback.

- Designed colour and text to follow WCAG guidelines and handed over to developers without direct contact, so the designs carried the intent.

SpurtX! platform UX audit (Product Designer, UX Auditor)

Spurt! Group · SaaS

- Audited each tool in a multi-product platform for usability, keyboard and screen-reader accessibility, and visual consistency.
- Grouped findings into five themes and rated them by user impact. Recommended shared fixes, such as one global focus style and one chart pattern with a text summary and data table, instead of page-by-page patches.
- Wrote each finding with the page, the problem, the fix and a clear "done when" condition, and worked with the product manager and developers to get fixes into the backlog.

Revela: event-management MVP (Product Designer, supporting role)

Cosmos Design Space · Web platform

- Designed most of the screens, including event creation, dashboard, ticketing, guest management, post-event surveys and certificates, and reports.
- Turned a competitor review into an event workspace with six tabs, a single-page create flow with optional toggles, and branding tools inside the product.
- Implemented product manager feedback and kept screens consistent through each iteration.

RobuPay: crypto payment platform (UI/UX Designer)

Roburna Blockchain · Fintech and blockchain · 2025

- Designed onboarding, dashboard and transaction flows for a payment product, with clear hierarchy and consistent patterns.

Blueprint For Tomorrow: Graduate Career Lab (Brand Designer)

MemaTech x Wakanaka Virtual Career Conference 2026 · Brand and campaign design

- Leading brand design for a joint Nigeria–Zambia career programme for young women, starting with brand guidelines: colour strategy, typography and campaign templates that give both partner organisations equal representation.

Education and certifications

- **B.Sc. Geography**, University of Nigeria, Nsukka (2021)
- **Google UX Design Certificate**, Coursera (2024–2025)
- Coursework: UX research, product strategy, AI and design tools, team collaboration

Awards

- Employee Excellence Awards (2023 and 2025), Vocalserv: for redesigning digital products and accelerating project completion
- Employee of the Month (2023), Vocalserv: for UI/UX improvements and fewer design iterations
- Leadership and Merit Awards (2017–2018), RESCAB: for initiative and teamwork
